Function and system design

Measuring principle Electronic monitoring and conversion of input signals in industrial temperature measurement.

Measuring system The iTEMP HART® TMT182 temperature head transmitter is a 2-wire transmitter with analog output. It has measurement input for resistance thermometers (RTD) in 2-, 3- or 4-wire connection, thermocouples and voltage transmitters. Setting up of the TMT182 is done using the HART® -Protocol with hand operating module (DXR275, DXR375) or PC (e.g. configuration software ReadWin® 2000 or FieldCare).

Input

Measured variable Temperature (temperature linear transmission behaviour), resistance and voltage

Measuring range Depending upon the sensor connection and input signal. The transmitter evaluates a number of different measurement ranges.

Power supply

Electrical connection

Head transmitter terminal connections

For the unit operation via HART® protocol (terminals 1 and 2) a minimum load resistance of 250Ω is necessary in the signal circuit!

Undervoltage detection	Optional for 'Advanced Diagnostic' version. If the supply voltage is not sufficient to output the output signal corresponding to the measured temperature, a signal on alarm ≤ 3.6 mA is generated. After approx. 2 to 3 s, the system makes another attempt to output the signal corresponding to the temperature.

Residual ripple Allowable ripple $U_{ss} \leq 3 \text{ V}$ at $U_b \geq 13 \text{ V}$, $f_{max} = 1 \text{ kHz}$

Performance characteristics

Response time 1 s (TC), 1.5 s (RTD)

Reference operating conditions Calibration temperature: $+25 \text{ °C}$ (77 °F) $\pm 5 \text{ K}$ (9 °F)

Input temperature drift $\Delta T = 10 K (18 ^\circ F)$, Pt100, measuring range 0 to $100 ^\circ C (32 \text{ to } 212 ^\circ F)$

Maximum process temperature: $100 ^\circ C (212 ^\circ F)$

Measured resistance value: 138.5Ω (IEC 60751) at maximum process temperature

Typical temperature drift in Ω : $(0.0015\% \text{ of } 138.5 \Omega) * 10 = 0.02078 \Omega$

Conversion to Kelvin: $0.02078 \Omega / 0.385 \Omega/K = 0.05 K (0.09 ^\circ F)$
